Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

This office action is in response to the Amendment of March 12, 2007. In making the below rejections the examiner has considered and addressed each of the applicant's arguments.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 1-5, 7-14 and 16-22 are rejected under 35 U.S.C. 103(a) as being unpatentable over Epstein et al in view of Pastrone as applied to claims 6-14 and 20-22 in the first office action.

Claim 15 is rejected under 35 U.S.C. 103(a) as being unpatentable over Epstein et al in view of Pastrone et al as applied to claim 7 above, and further in view of Das et al as set forth in the previous office action.

Response to Arguments

Applicant's arguments filed March 12, 2007 have been fully considered but they are not persuasive. The applicant has amended claims 1 and 16 to set forth that the pumping element includes a piston slider assembly having a piston head connected to a main body and that the single pressure sensor is connected to the pumping element between the piston head and the main body. Claim 7 has been amended to also have these limitations. The applicant argues that in "Pastrone, it appears that the pressure transducer 57 is not positioned between the piston head and the main body." The examiner disagrees. While the transducer is not located so that the piston head is completely on one side thereof and the main body is completely on the other side thereof, Pastrone does disclose that the piston head (53) is completely on one side thereof and at least a portion of the main body (51, the part which extends towards to lines and reference numeral 61) is on the other side of the single pressure transducer. Therefore the pressure transducer/sensor is between the main body and the piston head. The applicant's amendment of claims 1 and 16 has now made them fall within the scope of the rejection originally applied against claims 6-14 and 20-22.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the date of this final action.
